

THE MILLER.
The Miller sat by his mill.
On a stone at the bridge near by;
His face that once was smiling and round,
Was worn, and wrinkled and grey.
He had always been a sober man,
And virtuous his life adorned;
But his neighbors said who knew him well,
That he very often was cowed.
Nature for him had wonderful charms,
For she gave him wealth and power;
And while he cared not for her fruits,
He almost worshipped her power.
With no desire for "jovial times,"
He toiled for money and notes;
Still he would dance to the lively tunes,
And was often feeling his oats.
At length he died, for his work was done
And he passed from earth away—
Yet he was still waiting for his toll
That was due to him that day.
He might have lived, the people say,
To count his years at least four score;
But for a little grain of gold,
He received while toiling his door.
He had his toll and was buried low,
Where the golden grain fields wave;
He never knew that "the miller and his toll,"
So they told him twice at the grave.

A Lady's Experience with Roses.
For the benefit of the many amateur florists among your readers, and to ventilate the delight over my success in rose culture, I beg the favor of a small space.
Two years since I married and secured a house with the nicest bit of a garden attached, of about 80x125 feet. On the advent of spring, I began to improve this heretofore neglected strip, rising at five o'clock in the morning and working until seven. To illustrate my utter ignorance of gardening at this time, I planted the seed of the Petunia, Dianthus, Pansy, Phlox, etc., over two inches deep. The labor I performed in laying out beds, borders, walks, etc., and my neighbors complimented my hobby as "neat and tasty."
After a while, I consulted Henderson, Vick, Buist, and other books, and learned how to sow seed and cultivate plants, and succeeded to my satisfaction.
But I love the Rose! Finding prices too far above my means to secure all the varieties I would like to possess, I bought a treatise on Rose-culture with a view of raising my own. After patiently going through this book, I got the idea. The author was quite learned, not only in roses, but botany general, in Latin and Greek to a certain extent. He rather aimed to teach experienced florists, instead of amateurs to whom he specially addressed himself. Having no hot house or other appliances recommended, I thought to do a little summer experimenting on my own way.
Last spring I procured a box 12x18 inches and three inches deep, and filled it nearly to the top with clean paving sand, into which I placed cuttings from my neighbors' best stocks, about fifteen in number. These were all quite young shoots, three to five inches long. The box was kept all through the summer in the most exposed position in the garden, and was filled every morning with water, which kept the sand constantly and thoroughly wet. Excepting in two cases, they all lived nicely, and by the setting in of fall had rooted two or more inches in length. I then potted them off singly, in sand, loam, and manure mixed, in three inch pots. On the approach of winter, the pots were immersed to the tops in sand and covered over with brush, over which I placed a good layer of leaves and fresh horse manure. Three weeks ago they were all exhumed, and only two of the pots found to be broken by the frost, whilst all the plants were as fresh and green (excepting the absence of leaves) as the day they were buried. Up to this time they have been exposed in a window facing south, and not one of them contains less than fifty leaves, and all have a fair prospect of budding within a fortnight.
I have learned more from an experience like the above than I gained in poring over a learned treatise. If any beginner can be benefited by it, he or she is doubly welcome.—American Agriculturist.

THE PEDANT.
A man who has been brought up among books, and is able to talk of nothing else, is a very indifferent companion, and what we call a pedant. But we should enlarge the title, and give it to every one that does not know how to think out of his profession and particular way of life. What is a greater pedant than a mere man of the town? Bar him the play-house, a catalogue of the reigning beauties, and you strike him dumb. The military pedant always talks in a camp, and in storming towns, making judgments, and fighting battles from one end of the year to the other. Everything he speaks smells of gunpowder; if you take away his artillery from him, he has not a word to say for himself. The law pedant is perpetually putting cases, repeating the transactions of Westminster-hall, wrangling with you upon the most indifferent circumstances of life, and not to be convinced of the distance of a place, or of the most trivial point in conversation, but by dint of argument. The state pedant is wrapped up in news, and lost in politics. If you mention either of the sovereigns of Europe, he talks not only; but if you go out of the gazette, you drop him. In short, a mere courtier, a mere soldier, a mere scholar, a mere anything, is an insipid, pedantic character, and equally ridiculous.—Spectator.

A Curious Climate.
The climate of Peru is set forth by a correspondent as exceedingly peculiar and strange. It never rains there, we are told, during certain seasons, and when the atmosphere is filled with clouds, a "dew" falls so thick, heavy and continuous that it will saturate the heaviest clothing in less than half an hour. The coming and going of the clouds that distill this dew is another strange thing connected with Peru. The changes are repeated so rapid and violent as to startle the stranger. One may be walking along the street, gazing in the rich warmth of the sunshine, and admiring the deep, clear blue sky, when suddenly, and almost imperceptibly, a change takes place, "and from the south ward a mass of dark clouds come rolling swiftly across the firmament, and soon the blue sky is replaced by a somber pall, and to the glorious sunshine succeeds a drizzling, penetrating mist." And this is as suddenly changed again; even while one is preparing to guard against the mist, the sunlight and the sky reappear in all their brightness and beauty.

WILLIAM D. GUILD.—We clip the following from the Providence Journal: Mr. William D. Guild, the unfortunate engineer of the boat train, was a native of Little Rock, Hill, Kingston, although most of his early life was passed at Williamstown, Ct. He commenced his experience as engineer on the Stonington Road about twenty-six years ago, and has been in the employ of the New York and Erie Road for thirteen years, the Catwissa Road in Pennsylvania, for four years, and the last five years again on the Stonington Road. On one occasion in Pennsylvania when an axle broke while the train was on a high bridge, by crowding on all steam he carried the train safely over, when had the train been allowed to hang back, a most serious accident would probably have occurred. Another time a train under his control was stopped just in time to avoid a collision with a large rock which had fallen on the track. He had been presented with a valuable gold watch, inscribed with a complimentary testimonial to his efficiency in the service and to his constant faithfulness. Possessed of kind and generous disposition, he leaves a wide circle of friends who sympathize with the afflicted widow if her sudden and untimely bereavement. He leaves no children, and was a member of the Masonic fraternity.

DOWNING.—No American has built for himself a more permanent monument than Downing, the landscape gardener. It was his good fortune to begin his work not only with taste and knowledge and enthusiasm, but at the time when his favorite subject was new to the country. "Ah!" said Washington Irving, in Putnam's old office in Park Place, when he was chatting kindly with the tryons and beginners in his own art—"ah!" we old fellows had the advantage of you. When we began we had no rivals, but you clever young fellows extinguish each other. It was the sweet courtesy of the modest Nestor, but there was a certain degree of truth in what he said. Downing almost introduced the subject of landscape gardening to this country, and his works will be always valuable as well as interesting.

THE FIRST BRICK HOUSES erected in Philadelphia by Penn and his followers were built of imported bricks, and now that city is getting back to the old system. A peculiar yellow or buff brick, imported from Liverpool, is going in favor rapidly from the Quaker City, and can be laid down there cheaper than pressed Philadelphia brick.
Creditor.—"How often must I elimb three pairs of stairs before I get the amount of this little account?" Debtor—"Do you think I am going to rent a place on the first floor to accommodate my creditors?"
Mr. J. Y. Scammon, the proprietor of the Chicago Inter-Ocean, is reported to be the wealthiest newspaper man in the country. His fortune is set down at between \$4,000,000 and \$5,000,000.

SEMS OF THOUGHT.
Great objects form great minds.
No thoroughly occupied man was ever yet very miserable.
With time and patience, the mulberry-leaf becomes silk.
Poetry and consumptions are the most flattering of diseases.
In prosperity prepare for a change; in adversity hope for one.
Method is the very hinge of business; and there is no method without punctuality.
Quarrels would never last long, if the fault was only on one side.
We speak of educating our children. Do we know that our children also educate us?
There are no persons more solicitous about the preservation of rank, than those who have no rank at all.
Tis an ill thing to be ashamed of one's poverty, but much worse not to make use of lawful endeavors to avoid it.
Passion may not unfrequently be termed the mob of the man, that commits a riot on his reason.
A comfortable old age is the reward of a well-spent youth; therefore instead of introducing dismal and melancholy prospects of decay, it should give us hopes of eternal youth in a better world.

THE MILLER.
The Miller sat by his mill.
On a stone at the bridge near by;
His face that once was smiling and round,
Was worn, and wrinkled and grey.
He had always been a sober man,
And virtuous his life adorned;
But his neighbors said who knew him well,
That he very often was cowed.
Nature for him had wonderful charms,
For she gave him wealth and power;
And while he cared not for her fruits,
He almost worshipped her power.
With no desire for "jovial times,"
He toiled for money and notes;
Still he would dance to the lively tunes,
And was often feeling his oats.
At length he died, for his work was done
And he passed from earth away—
Yet he was still waiting for his toll
That was due to him that day.
He might have lived, the people say,
To count his years at least four score;
But for a little grain of gold,
He received while toiling his door.
He had his toll and was buried low,
Where the golden grain fields wave;
He never knew that "the miller and his toll,"
So they told him twice at the grave.

A Lady's Experience with Roses.
For the benefit of the many amateur florists among your readers, and to ventilate the delight over my success in rose culture, I beg the favor of a small space.
Two years since I married and secured a house with the nicest bit of a garden attached, of about 80x125 feet. On the advent of spring, I began to improve this heretofore neglected strip, rising at five o'clock in the morning and working until seven. To illustrate my utter ignorance of gardening at this time, I planted the seed of the Petunia, Dianthus, Pansy, Phlox, etc., over two inches deep. "Not only a necessity to the painter, but valuable to every occupant of a dwelling."—N. Y. World.
"Buy 25 copies of this book and distribute them among your friends. If they will heed the advice therein, you could make no more valuable present."—Chicago Tribune.
"In publishing this book Mr. Baird has done a real service to the community."—Tribune Blade.
"We hope the publisher will sell 100,000 copies of this book during '73."—Boston Advertiser.
"We have just painted our house as advised by the author, and congratulate ourselves that no dwelling in our neighborhood excels ours in appearance."—New York Weekly.
"In selling a sample copy for 10 cents, Mr. Baird must need certain an order for 25 bound in cloth will follow."—Frank Leslie.
"We know the town and country painters therein recommended, and can vouch for their value and the excellence of the 'Harrison' brand of white lead."—Phila. Ledger.

Only 10 Cents.
